

MEET THE STARTUPS

COHORT 2

cyber 
boost
catalyse

Programme by

Supported by

Powered by

CyberBoost Catalyse helps the most innovative and ambitious cyber startups from around the world fast-track their growth plans in Singapore and key international markets.

It supports with:

- International growth strategy
- Connections and partnerships
- Investment and commercial opportunities

The programme features an exclusive in-Singapore bootcamp designed to immerse the companies in the Singaporean market and grow their international networks.

With six months of support, companies will get unparalleled market opportunities and access.

To connect with the cohort, please email cyberboost@cybersg.sg and cyberboost@plexal.com.

CyberBoost has been established by the CyberSG Talent, Innovation and Growth (TIG) Collaboration Centre in Singapore. It's supported by the Cyber Security Agency of Singapore (CSA) and National University of Singapore (NUS) and powered by innovation company Plexal.

Programme by

Supported by

Powered by

Cohort two is a truly international group of 10 chosen startups from across Europe, the US, South Korea, Singapore and Israel.

They range from being bootstrapped to public, with 7/10 members seeking investment.

They're tackling important challenges, from addressing fraud and detecting deepfakes to securing supply chains.

Read on to meet our startups and get in touch if you'd like to advise, connect with or invest in the cohort.

Rauschenbach,
Government
Business Strategist

WANTS TO CONNECT WITH

- Customers
- Potential partners

Kyra has worked in the US and the Middle East as a researcher and analyst at organisations such as the United Nations and Palo Alto Networks, and currently leads on Reality Defender's government relationships.

Trust Stamp

 truststamp.ai

 [United Kingdom/United States of America](#)

 [Public company NASDAQ: IDAI](#)

ABOUT

Trust Stamp removes the vulnerabilities of stored credentials by tokenising and decentralising biometric authentication. It provides a frictionless, privacy-first solution that prevents fraud, strengthens security and improves efficiency.

Operates in: UK, US, Japan

Expanding in: Singapore

Targeting: Financial services

PROGRAMME AIMS

- Market expansion: gain insights into Singapore and APAC and refine entry strategies for smooth expansion
- Find collaborations for potential proofs of concepts
- Learning and mentorship: receive expert guidance on regulation, market positioning and go-to-market strategy

Ajmir Safi,
Vice President
APAC

Ajmir's role involves developing and nurturing global partnerships, supporting internationalisation strategies and navigating the dynamic relationship between innovation, government regulations and global trade.

WANTS TO CONNECT WITH

- Customers
- Governments and security agencies
- Potential partners such as distribution and reseller partners

ZeroPort

 zeroport.co

 Israel

 Seed and raising

ABOUT

ZeroPort redefines network perimeters with the first truly malware-proof, non-TCP/IP remote access solution. It can connect thousands of remote users for real-time work with no latency, no downtime and no vulnerabilities. ZeroPort simplifies and secures all your remote connectivity needs.

Operates in: Israel

Expanding in: Singapore, Europe

Targeting: Critical National Infrastructure, large enterprises

Joseph Gertz,
CEO and co-
founder

Joseph is CEO and a seasoned global sales leader with 20 years of entrepreneurial experience and sales leadership expertise.

PROGRAMME AIMS
